Early Bloomer Greenhouse

Our Early Bloomer greenhouse is a great all-around greenhouse. It is ideal for tall plants or small trees - the 6'3" height gives you plenty of room to grow. The super-strong composite frame makes it sturdy enough to withstand strong winds, and a large 19" x 30" vent assembly is included to maintain plenty of air circulation for healthy plants.

The lightweight greenhouse is portable, so you can set it right over your garden to get an early start planting seeds and an extended harvest in the fall. Two easy-access hanging rods at a convenient height run the entire length of the greenhouse to over-winter your favorite hanging plants.

The Early Bloomer, like all Solexx greenhouses, is freestanding and requires no special foundation or site preparation - just level the ground beneath it.

Early Bloomer Greenhouses include:

- Extra strong composite frame
- Twin-wall 3.5mm or 5mm Solexx™ panels
- Large manual air vent
- 2 full-length plant hanging rods
- Lockable Door
- 10-year limited warranty
- FREE delivery! (in the contiguous 48 states)

G-108 8' W x 8' L x 6'3" H (3.5mm)
G-108-SP 8' W x 8' L x 6'3" H (5mm)

Recommended Accessories

Deluxe Tie Down Kit

Secures your greenhouse in strong wind.

Optional Solar Opener

Auto opener available for your convenience. (no electricity required!)

Base Vents

Place in each corner of the greenhouse for optimal ground-up cross ventilation.

Shade Cloth

Help keep your greenhouse cool and protect it from the summer heat.

Room for lots of plants!

Gardener's Oasis Greenhouse

Escape to your Gardener's Oasis. This is our most popular greenhouse for a reason. You'll have maximum growing area with two double-tiered, built-in bench frames providing you over 76 square feet of bench area in the 8' x 8' unit for hours of year-round gardening pleasure - and you'll love the 8 foot height!

All Gardener's Oasis Greenhouses come with a large louvered air vent and are covered with advanced double-walled Solexx™ paneling. The Oasis, like all Solexx greenhouses, is freestanding and requires no special foundation or site preparation - just level the ground beneath it!

Gardener's Oasis Greenhouses include:

- Heavy-duty composite frame
- Twin-wall 3.5mm or 5mm Solexx panels
- Easy-Flow Louver
- Double-tier, full-length bench frames
- Two full-length hanging rods
- Lockable door
- Sturdy, built-in base, requires no foundation
- 10-year limited warranty
- FREE delivery! (in the contiguous 48 states)

Paradise for Hanging Plants

Garden Master Greenhouse

This spacious, European-style greenhouse has 6'6" tall outer walls and a gable that peaks at 8'9" for ample room to trellis plants like cucumber, and tomatoes. With four bench frames each able to support 500 lbs. of distributed weight and two hanging rods, you will be amazed at how much room you have to grow all your favorite flowers and vegetables.

All Garden Master Greenhouse Kits come standard with a large louvered air vent and are covered with advanced double-walled Solexx paneling.

The Garden Master, like all Solexx greenhouses, is freestanding and requires no special foundation or site preparation - just level the ground beneath it.

Garden Master Greenhouses include:

- Heavy-duty composite frame
- Twin-wall 3.5mm or 5mm Solexx panels
- Easy-Flow Louver
- Double-tier, full-length bench frames
- Two full-length hanging rods
- Lockable door
- Sturdy, built-in base, requires no foundation
- 10-year limited warranty

Perfect against a wall!

Harvester Greenhouse

The Harvester Greenhouse is completely enclosed for maximum strength, insulation, and solar heat collection. The Harvester provides the best of both worlds: a double-tiered bench frame maximizes your growing area on one side and a single bench frame on the other side provides is ideal for taller plants and provides easy-access workspace.

All Harvester Greenhouses come with a large, louvered air vent and are covered with advanced double-walled Solexx paneling. The Harvester, like all Solexx greenhouses, is freestanding and requires no special foundation or site preparation - just level the ground beneath it.

Harvester Greenhouses include:

- Heavy-duty composite frame
- Twin-wall 3.5mm or 5mm Solexx panels
- Easy-Flow Louver
- Double-tier, full-length bench frames
- Two full-length hanging rods
- Lockable door

For Serious Gardeners

Conservatory Greenhouse

The Conservatory Greenhouse is our largest, and with the 9'6" height, most spacious greenhouse. It's perfect for seedlings, large plants and even small trees. A large, 5' wide, double-tiered bench frame fills the center of the greenhouse for ample growing area.

All conservatory greenhouses come with two to four doors and are covered with advanced twin-wall Solexx paneling. The Conservatory, like all Solexx greenhouses, is freestanding and requires no special foundation or site preparation - just level ground beneath it.

Conservatory Greenhouses include:

- Heavy-duty composite frame
- Twin-wall 3.5mm or 5mm Solexx panels
- Easy-Flow Louver
- Double-tier, full-length bench frames
- Two full-length hanging rods
- Lockable door
- Sturdy, built-in base, requires no foundation
- 10-year limited warranty

Solexx Greenhouse Essentials

Exhaust Fan with Thermostat

Promote healthy, vigorous plant growth by venting stagnant air out and drawing fresh air into your greenhouse. Automatic thermostat control keeps air flowing throughout the season. Wiring and thermostat included. Requires 110v outlet.

12" Fan (760 CFM) HV-50
16" Fan (1250 CFM) HV-51
20" Fan (3000 CFM) HV-52

Motorized Intake

Use in conjunction with Exhaust Fan for ideal ventilation. This motorized intake creates an effective seal against outside air when closed, then opens to ventilate when the fan turns on.

12" Intake HV-60
16" Intake HV-61
20" Intake HV-62

8" & 12" Circulation Fans

This energy-efficient fan generates constant air movement in your greenhouse. Adjustable mount provides for easy installation. Five-wing aluminum blade. 5' power cord. 115 volts. Wire cage measures 9" deep x 9 3/4" wide.

HV-40
HV-41

Closeable Base Vents

ABS polymer vents allow fresh air to continually flow through your greenhouse. Mount a vent near the base in each corner of the greenhouse for natural 'ground-up' cross ventilation. Close during cold weather to save heat. Measures 4" x 9". **HV-20**

Shade Cloth

Reusable black polypropylene shade cloth filters out 55% of the sunlight, reducing heat on hot summer days. Reinforced, hemmed edges with grommets make attachment and removal easy. Also available: 30% and 73% shade options.

HV-91 8'x10' **HV-94 12'x12'**
HV-92 8' x 12' **HV-95 12' x 16'**
HV-93 8' x 16'

Greenhouse Flooring

Durable, black polypropylene flooring eliminates weeds from the floor of your greenhouse while allowing water to drain. Easy to install. Wire stakes included.

HN-29 10' x 10' **HN-33 10' x 24'**
HN-31 10' x 12' **HN-34 16' x 16'**
HN-32 10' x 16' **HN-35 16' x 20'**

Easy-Flow Louver

Made from rugged, outdoor-grade PVC, this louvered air vent keeps the rain out and lets the fresh air in. Four louvers. Manual operation. Comes standard with Solexx Greenhouses. Measures 12" x 24". **HV-30**

Easy-Flow Louver Solar Opener

Heat activated Louver opener does the work while you're away. Automatically opens and closes the Easy-Flow Louver as the air warms or cools. No batteries or electricity required. **HV-31-A**

Solar Powered Vent Opener.

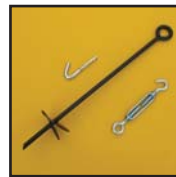

This corrosion-resistant, solar powered piston extends 12" to open and close greenhouse vents automatically. Works great with the Early Bloomer greenhouse. Piston extends and contracts adjusting the vent as the temperature changes. Easy to install and supports up to 15 lbs. **HV-10**

Wire Bench Shelf

Designed exclusively to fit Solexx Greenhouses, these heavy-duty, metal wire shelf racks allow good drainage and continuous air circulation around plants. Powder coated white to resist rust and reflect light. Includes mounting ties.

24" x 94" Back Shelf Package HN-18
29" x 94" Side Shelf Package HN-19-Kit
(See shelf kit)

Tie Down Kit

Keep your greenhouse safe in a strong wind with this easy-to-install kit. Bury the 14 1/2" tie-down anchors next to your greenhouse and attach the J-hook to the greenhouse frame. Turnbuckles connect the frame to the anchor. Disconnects easily if you want to move your greenhouse. Use 30" anchor in loose soil.

HN-10 15" anchors (set of 4)
HN-11 15" anchors (set of 2)
HN-12 30" anchors (set of 4)
HN-13 30" anchors (set of 2)

Portable Electric Heater

Durable, heater keeps greenhouse warm and plants safe from frost. Features two heat settings plus fan only. Includes tip-over switch and overload circuit for extra safety. Heavy-duty fan circulates heat. Maximum 5118 BTUs with a 1500 and 1300 watt setting. Requires 120v three-prong outlet.

HH-64
